

PHYSICS AND ASTRONOMY STUDENTS

We are always proud of the accomplishments of our students. Because we typically have only 6-10 students per class, we get to know each student very well. They study together (often in the physics student lounge) and play together. We often hear back from the students who have graduated and they relate how much they valued their close ties to their fellow students and their teachers.

Degree program and other academic information can be found under the [Academics Pages](#).

Many of our students are actively engaged in research during the summer, mainly here at VU, but also at other universities and labs. Please follow [this link](#) for more information about what research we do, what the [opportunities](#) are for you to get involved, and [what students have done in the past](#).
